# CS421/621 Lab08

React To-Do-List Application

Objective: Extend the basic To-Do List application to include additional features such as editing tasks and deleting tasks.

Requirements

1) **Add Editing Functionality:**
   - Allow users to edit existing tasks.
   - Include an "Edit" button next to each task.
   - When clicked, replace the task text with an input field and a "Save" button.
   - Save the updated task text when the "Save" button is clicked.

2) **Add Deleting Functionality:**
   - Allow users to delete tasks.
   - Include a "Delete" button next to each task.
   - When clicked, remove the task from the list

Submission:

- Submit all your project files to GitHub
- Submit your repo link and ICF to Canvas.
